

Warpspace Inc.

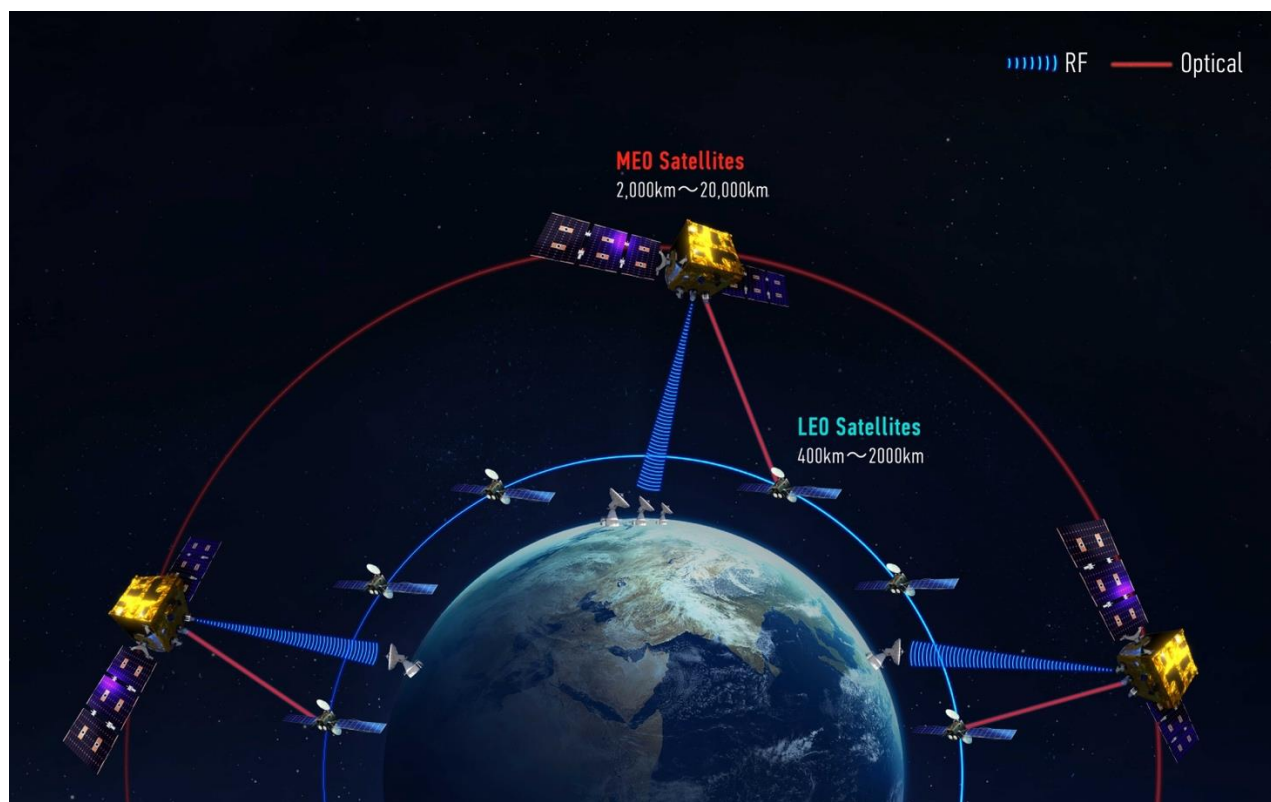

Company Profile

Name in Full :	Warpspace Inc.	Head Office:	Tsukuba Center Building 1F, 1-10-1 Azuma, Tsukuba, Ibaraki, 305-0031
Establishment :	2016	Telephone:	+81298568128
Capital :		President :	Hiromitsu Azuma
Employees	30	Website:	https://warpspace.jp/
Clients	2		

Providing Services

Warpspace is a space startup located in Tsukuba City, Ibaraki. We develop WarpHubIntersat, the world's first commercial optical inter-satellite communication network in space, which solves the communication issues that satellites can't quickly transmit large amounts of data to the ground. By enabling real-time monitoring of the earth, we will contribute to making disaster management more efficient, improving systems, and streamlining logistics.

We will launch three relay satellites equipped with optical communication terminal into MEO (2,000 km), and build a network system that can be constantly connected to the ground.

Project Achievement / Technical Expertise

- Selected for NEDO's "SBIR Program" for FY2023
- Wins Contracts from JAXA for Lunar and Long-Distance Optcom Studies 2023.
- Selected for JAXA R&D Project to Consider the Design of
- Optical Cislunar Communication Architecture for the Lunar Exploration.
