Providing Services

Our proprietary cloud-based fleet management system “SMOC” transforms chaotic traffic into organized and disciplined traffic.

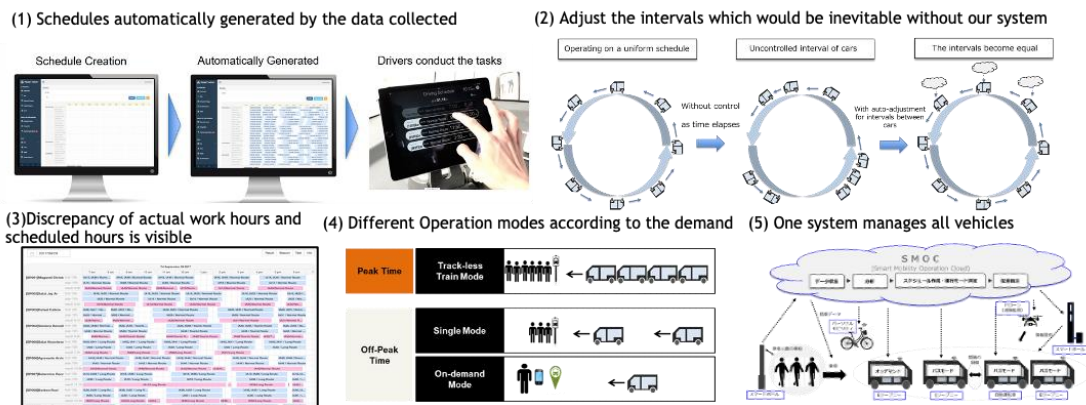

Project Achievement / Technical Expertise

Project Achievement

Zenmov is implementing projects in Japan, the Philippines, Brunei, Mozambique, and the UAE.

Technical Expertise

1. AI is used to generate optimal schedules that match travel demand.
2. Headway system contributes to equalization of vehicle interval and helps to equalize passenger waiting time.
3. Visualizing drivers' performance by comparing expected driving time to actual workload.
4. The operation mode can be changed dynamically depending on travel demand, for example, bus to on-demand.
5. Device and Fleet management functions are equipped, in addition to Operation management function.
